publication.

## 🔧 Projects(Recent 3)

### #1 OPT [View project](#)

**Domain:** Bridal, Jewelry and Watch industry with ecommerce

**About:** Omnichannel Performance Technology (OPT) is the premier provider of digital sales and marketing tools to discover sales opportunities, promote brand visibility, strengthen sales support, and monitor performance in-store and online. OPT provide services to over 1,600 stores.

**Responsibilities:** My roles includes lead UI team of 5-7 developers, understand requirements with team members, implement new UI features, components, and modules. We migrated catalog, showcase and loose diamond search modules from Backbone to React. Improved app load time down to 7-9 seconds. We developed own analytics platform.

## #2 Sitenalysis [View project](#)

**Domain:** Bridal, Jewelry and Watch industry with ecommerce

**About:** Omniconnect is a platform designed for brands with their retailers website insights.

**Responsibilites:** This platform is dashboard like app built using React/Redux. My responsibilites was to architect app, Create reusable components, co-ordinate with backend team to consume data/apis. I worked on View By Retailer, View By Product module with other team members.

## #3 ONE OF ONLY Showcase [View project](#)

**Domain:** Bridal, Jewelry and Watch industry with ecommerce

**About:** ONE OF ONLY (“OOO”) provides retailers with ONE website and app from which they can discover, share and order from a curated selection of ONE OF ONLY pieces.

**Responsibilites:** We took initiative to develop this app in React/Redux. I was responsible for architecturing project using react, redux, react-router, redux-observable and react-bootstrap. Developed catalog, blog, designers module. Implemented code splitting in React.js to improve app’s performance.
